## INTRODUCTION & MISSION STATEMENT

Hello,

My name is Judi Thomases. I've been a psychic-astrologer and spiritual counselor for over three decades, during which I've consulted, written, and taught astrology, metaphysics, Tarot, and I-Ching. I've authored many articles for nationally published venues, some samples of which are herein enclosed. I have extensive credentials in my field.

Furthermore, about a decade ago a new mediumistic ability unfolded, after which I was able to receive, from spirit entities, client messages, essays for publication, and eventually a complete book. These are not messages from the deceased, but rather teachings in consciousness for our age – teachings which, when passed along, cause the dark to get lighter, the inner to become more known, hope to increase, and empowerment to grow.

To disseminate these new (and ancient) concepts, I created a company called Wisdom Path, and have done extensive media work, written articles for the general readership, taught colleagues and the lay public, guested on and co-hosted several cable and radio shows, and established several regular monthly columns in magazines and on websites (my own included). Currently, I'm also contributing as a spiritual consultant on a movie project.

As my mission, I feel tasked with passing along higher understanding as has been revealed to me, by gently yet light-heartedly awakening insight for down-to-earth growth through responsible counseling and all forms of communication, such as books, articles, classes, coaching, and speaking engagements.

I've enclosed samples of my work, and ideas for new articles or shows, as well as much background material. Much more is available at [www.wisdompath.com](http://www.wisdompath.com)

Thank you for your interest. I hope I can offer you something that meets your needs for depth, entertainment, news topicality, and future prediction.

Yours truly,

Judi Thomases

## ABOUT WISDOM PATH

### **WISDOM PATH GUIDANCE A GENTLE COSMIC PERSPECTIVE FOR YOUR DOWN-TO-EARTH GROWTH**

Judi offers a unique blend of counseling services – intuitive, psychic, spiritual, psychological and deductive – to aid your quest for love, well-being, prosperity and achievement. Wisdom Path is a journey to insight and empowerment, guiding clients into greater harmony with their Higher Plan.

Using the natal horoscope of the client, she explains the soul's agenda (its purpose in being on earth). Using progressed, transiting, and other past, present and future horoscopes as well as Tarot, AstroDice, and sometimes I Ching, she helps the client understand their upcoming energy patterns and how best to navigate through them. And most special, using a finely honed gift of clairaudience, she mediumistically receives the words of her guides, The Brotherhood of Light Workers, to offer the client profound messages from beyond. (This inner voice, in a series of many important messages, explained itself as a group entity whose mission, they said, was to show us an empowering new way to view life's hardships. Gradually, these teachings completely changed my perspective of life, and consequently my readings, which has caused me to rename my work Wisdom Path Guidance, for that's what it has become.)

The deep but gentle cosmic insight thus gained becomes a tool for growth, a way of compassion, and a profound device to speed up one's karma no matter the type of issues needing to be addressed. The client is thus guided into clearer choices, more sensible reactions, and deeper fulfillment by harmonizing with the larger energy patterns as shown through astrology, Tarot, and trance-channeled teachings, and is offered support in current dilemmas and joyful expectation for future co-creations

Wisdom Path also offers products many exciting and enlightening products, informational and otherwise, that can be used for self-discovery, inspiration and holistic healing to help you on your journey.

### KARMIC WAVES, THE DESTINY OF THE UNITED STATES...AND YOU!

by Judi Thomases (Dell Horoscope, May 2006)

#### What are “Karmic Waves”?

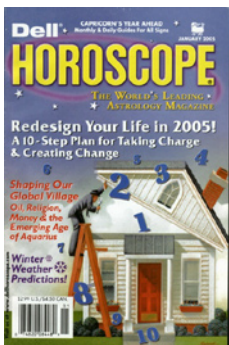

As humans, we’re subject to larger evolutionary forces – destiny, if you would – while we’re on Earth. These forces serve a Divine Plan, or Intelligent Design, to propel life towards greater and greater awareness. As they play out, these forces can be considered Karmic Waves. What we create as individuals and in groups can then be experienced against a backdrop of continuously shifting patterns, which patterns, in turn, provide us with the energy available for creating our individual lives and the world.

Astrologically, we see some of these evolutionary forces as Pluto in its journey through the signs. Its very discovery heralded a change in human consciousness: the awareness of the existence of the psyche and its depths.<sup>1</sup> Pluto, as you know, symbolizes death and rebirth, destruction and transformation, the deep process of rooting out of life’s ugly underbelly that which needs to be brought up into the light to be cleansed and renewed.

For America, Pluto recently brought mass death and destruction in the first bombing at the World Trade Center in 1993<sup>2</sup>, then on 9/11 when it transited the U.S. Ascendant at 12 Sagittarius (Sibley chart), then during the Iraq War, and then in its most extreme manifestation – an attack by Mother Nature herself – during Hurricane Katrina when it stationed final at 21 Sagittarius opposite the U.S. Mars exact. These events are neither random nor meaningless, but part of a larger pattern of karmic waves, whose meaning will be explored in this article...

### THE TOP 10 WAYS TO ATTAIN WISDOM THROUGH ASTROLOGY

By Judi Thomases (Dell Horoscope, January 2005)

Lots of coaches in the business and personal growth fields advise us to state our goals in life in order to make them concrete and bring them to realization, and these advisors often use a format of “Ten Tips to Doing/Reaching Something...” to make their point simply and clearly. So I figured, why not apply this approach to astrology? After all, the entire practice of astrology is a path to growth, and the amazing awareness it gives the practitioner is one of the best tools available for reaching that. So, why not analyze the way in which to put this golden tool to use in a structured, outlined format, just as would be applied nowadays to any practical endeavor?

You might want to read through this material twice, the second time with a pen in hand and a few nice, clean sheets of paper to take notes on, because every one of the following ten items will apply to you, and, when implemented, can help you redesign your life and ease your journey...

**OCTOBER 2005**

—Nancy Passow, *Write For You in NJ*

*www.write4unj.com*

Although her business is non-traditional, Judi Thomases' approach to business is very traditional. Join us as we discuss with Judi how her business, *Wisdom Path*, has grown and prospered.

**Q. Tell us about your business and your new book "Wisdom's Game's"**

**Judi:** I started my business in 1975, incorporating it in 2000. I offer my clients consultations using the tools of astrology, Tarot cards, AstroDice, I Ching, and Channeling. This helps them on their path of development and allows them to make wiser choices, hence the business name *Wisdom Path*. The book itself grew out of a new skill I developed several years ago allowing me to receive messages from an elevated source (Channeling). The actual process of writing the book was very different from my usual writing experience. But once I knew I had the substance for the book, I started to focus on the publishing and marketing aspects. I found some book coaches, bought a manual on self-publishing, participated in a teleseminar where I was able to find a great editor, and I subscribed to several on-line newsletters on

promotion. In addition to the book, I write monthly columns for the publications *Dell Horoscope* and *Inner Realm*..

**Q. What led you to go into business for yourself?**

**Judi:** I was pushed into it by life. People were asking for my help. I had trained and worked as an interior decorator and then did a variety of jobs including editing, computer photo type-setting, clerical, promotion (I helped put together the first Star Trek convention in Manhattan), and helping my husband run his family business. But I was seeing clients at the same time. I finally decided to make my own business my primary focus.

**Q. What do you consider your greatest success?**

**Judi:** My greatest success was counseling a client away from suicide—nothing else has as much meaning for me. Other successes include getting my book published, having a continuous stream of articles published, and developing an international clientele.

**Q. What do you enjoy most about your business?**

**Judi:** First, getting to know people on a one-to-one basis, getting deeply connected to my clients. And second, getting great feedback—when a client comes back to say a prediction was accurate or that they felt really good about the session.

## RECENT PRESS CLIPPINGS, PRESS RELEASES, REVIEWS (cont.)

### **Q. How have you grown your business and what are your plans for the future?**

**Judi:** Promote, promote, promote! I started by meeting with clients, then I wrote articles, developed a regular column, gave talks, and offered auxiliary products. At the end of each column I put my contact information, including my web site, phone number, and ordering information for my book. I developed two web sites and I am constantly writing new articles. When you are marketing your business, you need a variety of ways to gain exposure. Once you have people reading your articles, they will want to buy your book or arrange for a personal consultation. Now I am developing more secondary products including CDs, an e-book, and an audio book. I would like to have a talk show on the radio and teach some classes.

### **Q. What have been the greatest obstacles you've had to overcome?**

**Judi:** First, getting clients. Second, being taken seriously. That is one of the reasons I joined RBWN—it helps to give me credibility.

### **Q. What advice would you give to other women starting a business?**

**Judi:** You need a warm heart, perseverance, thick skin, self-discipline, sincerity, hard work, to be able to adjust to market demands, and to be able to intuit what your client needs.

### **Q. How has RBWN helped you?**

**Judi:** RBWN helps to give my business legitimacy.

I learned how to take a professional approach to business and how to develop my “elevator speech”. I got help putting together my logo and other materials. RBWN is a supportive network of entrepreneurial women from which I have found friends, referrals, clients, and connections.

### **Q. How do you attract clients? And who are your clients?**

**Judi:** I mainly attract clients through referrals, word of mouth, repeat business, articles, and talks. My clients include a Beverly Hills psychiatrist, an opera singer, a film director, lawyers, teachers, nurses, a school bus driver—all sorts of people, located throughout the world.

### **Q. Tell us a little about yourself and your family.**

**Judi:** I have a B.A. in creative writing from Douglas College, and graduated Phi Beta Kappa. I enjoy reading, relaxing in the hot tub, and traveling with my husband. We have three children, two of whom helped me with my business—my son is a patent attorney and my daughter is the founder and owner of an internet marketing and advertising business.

Wisdom's Game: How to Change Life's Pain Into Joy

Judi Thomases

Cypress House (2005)

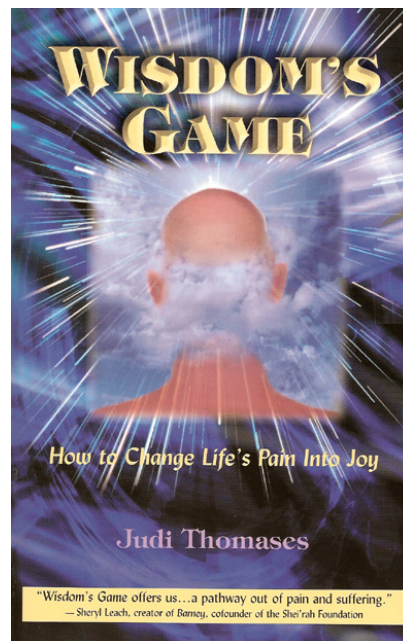

ISBN 1879384574

Reviewed by Deah Jackson for Reader Views (5/06)

This book is simply amazing. I read this book four times in a month before I even decided to write this review. It is only 105 pages, but it is a lot to digest, and it is a book that every time you read it you gain a new piece of knowledge. Judi Thomases, the author of "Wisdom's Game," has a background in astrology, tarot, psychic development and channeling. This book was channeled through her by The Brotherhood of Light Workers. Is that too "new agey" for you? Well don't let those things fool you; this book is DEEP regardless of your beliefs or religious background.

As I read this book, I remember it feeling like I was eating chicken soup on a cold rainyday, it was so comforting! The book talks about the game of life and how to turn suffering into joy. The book is separated into small chapters and before each chapter there is a preview and an inspirational quote. Each chapter is a gem within itself, explaining why we are here on this earth, and how to deal with pain in our lives. It offers new perspectives on life and anyone who reads this book can gain higher levels of consciousness just by reading the words of truth written within this book. "Wisdom's Game" exposes the bigger picture, the greater plan of life.

For example the first chapter's preview states: "Wisdom teaches that, while temporary pain is normal, continual suffering over its cause isn't necessary. We can instantly change our thoughts to

take things more lightly." Another one of my favorite quotes in this book is from chapter five. "It is the impetus of suffering that always stimulates the greatest desire for change. Suffering, and nothing else, is the abrasion that produces wisdom." Oh my gosh! Of course it is! Aha! Light bulbs, everything went off inside of me! When I read that quote I felt a rush of understanding within myself. So many times, when I have gone through difficult times, I have asked the question why? Well within this book are the answers to the why of why we suffer, and how to deal with pain in a better way. I can really see myself re-reading this book, especially when I might be going through a difficult time.

This book is simply amazing and so needed for the human Light Workers in times like these. "Wisdom's Game" is truth and inspiration from cover to cover. I would say, if you have somehow stumbled across this book and this review, you HAVE to read it... no, you have been CALLED to read it. I would guarantee that anyone that picked up this book would gain something from it! Five stars plus!

sense to read up on where these ideas came from. Borstein's overview is an excellent field guide.

**WISDOM'S GAME—How to Change Life's Pain into Joy** by Judi Thomases; Cypress House, 155 Cypress Street, Fort Bragg, CA 95437; www.cypresshouse.com; 2005, paper, 128 pp. (5 1/4" x 8 1/2"), \$12.95, plus \$3.00 postage, ISBN 1-879384-57-4.

Life is a game, and we, the people of planet earth, are players on the board. While many of us, if not most of humanity, feel the pain of life, the suffering and distress, we do have help. They are the spirit guides that are with us, working with us to make the right moves. Making the right moves means recognizing the basic rules of life, and this is called wisdom. What are the rules of this game?

The answers come in Judi Thomases concise, channeled book *Wisdom's Game*. Over the course of twenty-one brief chapters, the author's spirit guide reveals the nature of our reality, the meaning of life, and what we can expect in the coming new age, the Age of Aquarius. These channeled messages are reminiscent of Jane Roberts' "Seth" material, and, in fact, Roberts' husband wrote the forward to this book. The entities that Thomases is tuning into are collectively called the Brotherhood of Light Workers, and seem remarkably similar to Theosophy's group of spirit guides with the politically incorrect name of the Ascended Masters of the Great White Brotherhood, though both groups are said to come from Tibet.

Skeptics of this channeled information will remain skeptical, while those with a more open mind will find some profound

insights into our current geopolitical state of affairs, as well as plenty of interesting and profound personal advice for achieving spiritual growth. The essential universal truth that is repeated in a variety of ways is that we are all part of a larger living being. Our neighbors, our spirit guides, and even God are all part of this larger entity. Only our current state of consciousness prevents us from understanding or seeing this wholeness. The organized religions of the past several thousand years have taught that God is some external entity, like a stern or wise parent. In the coming new age, we will all see that we are co-creators of our collective reality.

A careful and thoughtful reading of the channeled information will likely bring one to underline specific passages. These are the messages that ring true and that might be copied and placed under a magnet on the refrigerator door. One of these aphorisms reflects the lunar nodes theme of this month's column and states that the "age-old pain of discontent with physical existence is about to be replaced by a new standard: discovering your soul's higher purpose and striving to achieve it."

## PRESS IDEAS: ARTICLES, INTERVIEWS, Q 's & A's

### BASED ON "KARMIC WAVES" ARTICLE

- Mid-East wars vis-à-vis astrological factors (Pluto at end of Sagittarius = conflicts of beliefs; Pluto conjuncting the Galactic Center = evolve or die for humanity; Pluto-in-Scorpio generation = fanatics) and metaphysical predictions (e.g., End Times, Mayan calendar, Hopi, Nostradamus, etc.)
- Israel as Chosen People (chosen for what? By whom?); United States as tasked with world mission (v. Great Seal)
- Generational patterns determining key business trends (e.g., what's driving fashion field, clubs, dance idols... or why are there so many rich kids?)
- The game feels very real and challenging.
- There's a trick to winning life's game: to realize that your thoughts can change your world, and therefore your response to life's pain.
- You are the creator of your life, and your power to win is in your hands.
- Why do we play such a difficult game? Because we're all really spirit (or energy), and while that state is without pain (or limitation), it's also boring. Endless bliss is a drag!
- So spirit created form, and we squeezed our vastness into it, and started the game.

### BASED ON "WISDOM'S GAME" BOOK

- It's not an accident! It's not bad luck! You're not a victim. You are responsible for everything. All is chosen, and you're in earth-school, doing it over and over until you learn wisdom by playing the game of life. Learn a new way of understanding your life so that you can find your inner happiness.
- When people are born, we think they randomly enter the world. But we are all here to play an inner game. And we're choosing a set of circumstances that will be difficult...but exciting.
- That's because we're all really spirit (no bounds). It's a lovely, but ultimately, boring thing. So we *choose* to play this game.
- We make a bargain
- When we're born, everybody makes a bargain to play a game – the game is, we'll accept suffering in return for being able to grow and live an interesting life.
- Each life is completely unique, so the game is eternal and never repetitive. There's never been another "you" playing it.
- Now you're here, and you have a unique set of problems and of luck. Do you want to know how to "win" at your life?

**MEDIA QUESTIONS for Wisdom's Game  
for ARTICLES/INTERVIEWS:**

**Q:** You're an astrologer, but this book isn't about astrology – how did this book come about?

**A:** Period of personal pain. Started getting messages clairaudiently, guided me through.

**Q:** What's the process of channeling?

**A:** Like logging on. Must completely clear thoughts. Wait. "Hear". Start hearing words. "We are here" or "Begin!". Words come thru slowly but clearly. Have to capture them. Like taking dictation. I'm a receiver and a messenger.

**Q:** Do you "talk" to deceased loved ones?

**A:** No. Completely different. Not psychic or mediumistic. The Brotherhood of Light Workers are like teachers. Giving us a message from spiritual guides. General philosophy for living, seeing life in a different way. Showing us how to

- Peace of mind
- Attainment of true desires
- Overcoming life-long obstacles

**Q:** How can you banish inner pain right away?

**A:** The book's core message: we think we're our thoughts and our emotions, but we're not. We're "spirit, corseted". We're here playing a game that feels real and intense. But it's a game. So it has rules, strategy, and a way to win.

You win by gaining wisdom. Wisdom shows you how to move from pain to joy quickly, even immediately. But the only way to gain wisdom is thru suffering! It's required but doesn't have to be prolonged. There are five Rules to winning.

"It is the impetus of suffering that always stimulates the greatest desire for change. Suffering, and nothing else, is the abrasion that produces wisdom."

Once you understand that you accepted – even created – the terms... you can use thought and humor to move out of suffering ASAP.

"To laugh at yourself in the midst of your gloom is the best possible antidote to heal the sting of pain."

**Q:** What else is the book about?

**A:** Why we're alive and playing this (sometimes) tough game. [Because spirit wants to evolve, has nothing better to do!]

What we really need. [To figure out, and express, your higher purpose/heart's desire.]

What's the real meaning of "The Age of Aquarius" and where humans are headed. [See selves as god-in-training/creator of the world. Create a society that sees that in others, and values it.]

What the present dilemma of being human is. [To overcome the illusion of separation and helplessness – that is, of suffering. To transform life on Earth.]

**Q:** Can anyone hear these messages?

**A:** Many are receiving, but not all. It's an ability. But all can tune into the spiritual realm more so. There are 3 how-to steps in the book.

**Q:** The book touches on some deep concepts, such as the ending of time and what the evolving human will be like – can you explain some of these more?

People will start to realize that the spiritual realm is real and not somewhere else –we're always part of it. So we'll see ourselves as joined, not separate. We'll also realize how our minds are creating certain illusions about life. The understanding of space and time will change. Also, life's purpose and values will be changed by this understanding.

**PRESS IDEAS: ARTICLES, INTERVIEWS, Q's & A's (continued)****BASED ON ASTROLOGY - POSSIBLE QUESTIONS:**

- What can astrology show about your luck when it comes to relationships?
- Can it show how long a relationship might last – if it's long-lasting or short and unstable?
- Can it show when an important relationship could happen?
- Are some people more prone than others to passionate, intense stuff?
- Are you in a relationship now, and want to know if you're compatible enough?
- Have you had a bad experience in a relationship, and want more insight?
- What's happening today that's astrologically important?

**ADDITIONALS FACTORS:**

**Q:** What information would be required to have a session?

**A:** Your birth date, birth time, and city of birth. The nature of your business, and the purpose of the special event to be planned.

**Q:** What work is entailed when an astrologer does a reading?

**A:** One or more horoscopes are drawn up and analyzed. A computer is used for the calculations, but experience and intuition are applied for the correct interpretation. In the

case of Electional Astrology (event planning), many horoscopes are analyzed again and again while seeking the best possible patterns for the targeted results. Thus, preliminary work can require several hours of preparation in addition to the length of the actual consultation.

**Q:** Are all astrologers skillful to the same degree?

**A:** No, some are trained; some just buy the software and set up a practice. Also, the more reputable belong to one or more of the national organizations, and are known in their field through referrals or publishing.

**Q:** What is the typical length of a session, and how is it conducted?

**A:** One to one-and-a-half hours. Phone consultations are most common – they are taped and mailed afterwards. Or a session can occur in person at my office.

**Q:** What's special about your practice?

**A:** I combine astrology, Tarot, trance-channeling, psychic sensitivity, and maybe I Ching or aura reading, all to gain insight into the emotional reasons behind the predicament, and determine the best route to take to reach harmony and empowerment.

## FAQ's

### WHAT IS TAROT? WHAT IS ASTROLOGY?

TAROT is a body of symbols referring to the two levels of human existence — the everyday or outer experiences such as love, studies, business, enterprises, etc.; and the inner or soul development which is common to all people. Its operation is based on the principle of synchronicity, much like the I Ching. Through its interpretation can be gained knowledge relating to such things as successful decisions, self-destructive actions, helpful partnerships, foolish attitudes, and so forth.

ASTROLOGY is a blueprint of an energy pattern (of an individual, a geographical place, a thing, or an event) at a certain moment in time and space, against which new and different energy patterns are continuously interacting. It, too, refers to the two levels of existence, inner and outer. Its operation is based on the principle of mathematical harmonics, much like music. Through it interpretation can be gotten information relating to such things as inherent personality traits, major areas of life-activity, past and future timing of events, compatibility and duration of relationships, and various probabilities.

ASTROLOGY relies on left-brain rational data, and is more precise regarding timing. TAROT relies on right-brain intuitional data, and is more useful for receiving "guidance from Above." Both are wonderful!

### OF WHAT PRACTICAL USE?

BUSINESSES can use these tools for timing of investments, screening and placement of personnel, spotting trends, discovering potential talent on your staff, and avoiding deceptive partnerships.

THERAPISTS... for uncovering psychological weaknesses in clients, pinpointing behavioral problems, seeing familial patterns, and gauging their own effect upon their clients.

MEDICINE... for diagnosing physical predispositions, and for finding preventive possibilities.

SCHOOLS... for locating latent talents and/or learning disabilities in students, for avoiding poor teacher/ pupil combinations, and for understanding students' peak and low periods for achievements and honors.

INDIVIDUALS... for realizing their own potentials and limitations, for gaining greater self-awareness, and for receiving understanding and comfort during difficult times in life.

### WHAT IS CHANNELING?

The dictionary defines a channel as a path or passage through which something moves or passes, often communication. And as a verb, to channel is to direct or convey something through a pathway.

Thus, in a metaphysical sense, a channeler is someone through whom information is conveyed - as one whose very consciousness is the passageway for such information to be directed.

The quality of this technique depends on the clarity of reception; the value, upon the importance of the information being conveyed. If the channeler can receive and transmit information from higher sources as clear as a bell, and if the information is meaningful and beneficial to another's soul growth and joy, this technique will be profoundly helpful to the seeker.

### ABOUT MEDIA

“Thanks for the wonderful seminar. We enjoyed having you as our guest!” -**Annie Jennings, P.R. company**

“Any discussion with Judi Thomases is both captivating and enlightening. A true professional when it comes to her craft. She is supernatural. - **Richard Quinn, Program Director, Rockland World Radio**

“Judi Thomases was one of our most popular guests during my daily, morning drive time radio show on Fairfield County Connecticut’s most powerful AM station, WREF. By popular demand, Judi was invited back monthly to share her knowledge and wisdom on all astrological topics. Judi is straightforward and honest in her approach to educating the public, and her professional and friendly style endeared her to thousands of listeners!” - **Devon Wickens, WREF radio host and producer**

### ABOUT BOOKS & ARTICLES

“I was immediately struck by the depth of wisdom conveyed in the Brotherhood’s messages, and by their similarity in essence to some of Seth’s teachings. The new ideas coming across are as unmistakable as they are enlightening. - **Robert Butts, Husband of late author Jane Roberts (“Seth”), Sayre, PA**

“Each time I go back to the material, it’s like I’m reading an entirely different book because it resonates anew. It feels as if it’s been rewritten just for me.” - **Sheryl Leach, Creator of Barney, Founder of the Shei’rah Foundation, Producer**

“This book is simply amazing. I read this book four times in a month before I even decided to

write this review. This book is so needed for the human Light Workers in times like these. ‘Wisdom’s Game’ is truth and inspiration from cover to cover. I would say, if you have somehow stumbled across this book and this review, you HAVE to read it... no, you have been CALLED to read it. I would guarantee that anyone that picked up this book would gain something from it! Five stars plus!” - **Reviewed by Deah Jackson for Reader Views (5/06)**

“Rich, original and timely, Wisdom’s Game offers channeled information to better our lives in all areas. Sure to resonate with fans of the Seth material.” – **USABookNews.com**

“A must read. Judi Thomases is herself a person of skill, compassion and wisdom and her game is to help enlighten the world, and she succeeds most elegantly in this insightful and engaging book.... The author claims that the words contained in her work flowed into her from another higher source, independent of herself and out onto the pages of this book. I do not doubt that what she claims is true but even as an intermediary or channel it is highly suspect that a goodly portion of her sage essence does not permeate this meaningful tome.” - **Paul Leonard Morris, Author of ‘The Hidden Planet’**

“Wisdom’s Game by Judi Thomases is a jewel of a book. It is probably the most important and useful spiritual book I have ever read. The information being channeled is profoundly insightful and helpful. As you read this book you understand that what you are reading is the real deal, the way it really is. I highly recommend Wisdom’s Game and have already given copies to my friends.” - **Paul Lamb, Medical QiGong Therapist**
